the BCR.						
1.7 Are there significant ben	efits or	costs th	at have	not bee	en captu	red in

the above BCR?

Please explain whether there likely to be material benefits or costs that have not been captured in the above BCR. Please differentiate between monetised NATA benefits

that have not been captured in the above BCR, non monetised NATA benefits and impacts that you do not think are included within the NATA framework. Please provide evidence to support any further impacts claimed. We will ask for more detailed evidence in due course during 2011 for schemes in the Development Pool.
1.8 Please describe the latest position regarding any developments associated with the case for the scheme?
If the business case for the scheme is associated with housing and commercial developments please describe the latest position regarding each of these developments, particularly where there have been changes since the most recently submitted business case. This should include any changes to numbers of housing, jobs etc. and information on planning consents applied for or granted. If possible please provide a letters or statement of intent from individual developers that state their present intentions regarding the scale, nature and timing of their developments.

SECTION 2: SCOPE FOR REVISED PROPOSALS In this section we are asking for an early indication of your intent, without prejudice to
what you might choose to include in your Best and Final Bid in autumn 2011. Nothing you include here will be binding upon you or on DfT.
2.1 What changes in scope do you plan to consider as compared against
the scheme as described above? Please attach plans and/or maps if necessary to illustrate the nature of the possible changes. You may include more than one option here but please be clear on any 'red line' issues – e.g. reductions in scope below which you would not be prepared to take the scheme forward.
2.2 Can you describe the likely impact of the seems changes described
2.2 Can you describe the likely impact of the scope changes described above on value for money and achievement of your stated objectives Your answer to this question does not need to include a precise value for money calculation (unless one is already available) but it should provide a commentary on where there would be expected to be a material change to costs and benefits (both monetised and non-monetised), and in which direction. Please provide evidence if available.
2.3 Can you describe the impact of the scope changes on your timescales for delivery at 1.3 above
For example if they would require restarting statutory processes, procurement etc.
2.4 In addition to any significant changes in scope, can you quantify the
potential for savings in the overall cost of the scheme, for example
through value engineering? We do not necessarily expect firm costings at this stage but please give some
7 1 5 1 5

indication of scale.
2.5 What is your latest assessment of the cost, feasibility or value for
money of any alternatives to the proposed scheme.
This could include any lower cost alternatives to the scheme as appraised by you in
previous business cases or those proposed by third parties. Please make reference
to any material differences with the preferred scheme in costs or benefits such as
carbon impact.
